

# Facility Bomb Threat Workshop

## Course Description

This two-hour workshop will provide facility administrators, advisors and security leaders the knowledge, perspective and skills necessary to plan for, evaluate and respond to any bomb threat at the facility while successfully engaging employees in the response and minimizing facility disruption.

## Key Features

- ✓ Bomb threat presentation by a certified bomb technician
- ✓ Take-away decision-making tools
- ✓ Practice scenarios

## Course Benefits

You will improve safety and security while maintaining operations through the ability to:

- Evaluate a threat and estimate potential severity
- Describe the type, operation and effects of improvised explosive devices
- Determine a safe and secure evacuation to the extent necessary while minimizing operational disruption
- Prioritize and select search methods for suspicious items
- Understand the capability of law enforcement vs. bomb squad
- Achieve the three main goals common to any bomb threat response:
  - Notifications and resources
  - Threat assessment
  - Command and control
- Integrate the response of first responders and bomb squad
- Quickly plan and respond by using tools provided in the workshop
- Practice ten exercise scenarios

## Recent Participant Comments

- ✓ *Good information and the scenarios were realistic. Great presentation.*
- ✓ *With today's threat level this was very pertinent and delivered well.*
- ✓ *Excellent and very informative.*
- ✓ *The flowchart provides a concise process for the IC to utilize when confronted with a bomb threat. The scenarios are useful tools to prompt thinking and practice about various levels of threats.*
- ✓ *Excellent presentation. I appreciated the scenarios. It challenged me to evaluate our policy.*
- ✓ *Very outstanding! I came on my vacation – it was worth it.*
- ✓ *I'm a hands-on learner. The scenarios and visuals are great and I liked the discussion.*
- ✓ *Very relevant information. Extremely knowledgeable presenter.*
